7. Financial instruments

(a) Risk management

The Corporation's activities expose it to a variety of financial risks including credit risk, liquidity risk and market risk. This note presents information about the Corporation's exposure to each of the above risks, the Corporation's objectives, policies and processes for measuring and managing risk, and the Corporation's management of capital. The Corporation employs risk management strategies and polices to ensure that any exposures to risk are in compliance with the Corporation's business objectives and risk tolerance levels. While the Board of Directors has the overall responsibility for the Corporation's risk management framework, Sunora's management has the responsibility to administer and monitor these risks.

(b) Fair value of financial instruments

The fair values of accounts receivable and accounts payable and accrued liabilities approximate their carrying values due to the short-term maturity of those instruments.

(c) Credit risk

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Corporation performs ongoing credit evaluations of its customers and establishes an allowance for doubtful accounts based on credit risk applicable to certain accounts, historical trends and other relevant information. Management believes the risk is often mitigated by the size and reputation of the companies to which they extend credit.

As at June 30, 2017, the Corporation's maximum exposure to credit risk for accounts receivable is:

	•	June 30, 2017	December 31, 2016		
Current Greater than 30 days	\$	1,083,541 6,465	\$	949,816 -	
Accounts receivable	\$	1,090,006	\$	949,816	

During the six-month period ended June 30, 2017, sales to two customers represented 41% of the Corporation's total sales (six-month period ended June 30, 2016 - one customer - 19%).

The accounts receivable balance is widely diversified with the exception of three customers (December 31, 2016 – two customers) that represent 37%, 20% and 10% of the accounts receivable balance at June 30, 2017 (December 31, 2016 – 27%, 20%, 13% and 11%).

The Corporation manages the credit exposure of \$3,356,010 related to cash and cash equivalents by selecting financial institutions with high credit ratings and monitors all short-term deposits to ensure an adequate rate of return. Given these credit ratings, management does not expect any counterparty to fail to meet its obligations.

(d) Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they are due. The Corporation's approach to managing liquidity is to ensure it will have sufficient liquidity to meet its liabilities when due. The Corporation's ongoing liquidity is impacted by various external events and conditions, including global economic conditions.

The financial liabilities on the consolidated balance sheet consist of accounts payable and accrued liabilities and customer deposits. The Corporation manages this risk through detailed monitoring of budgeted and projected operating results and cash requirements.

At June 30, 2017, the Corporation had cash and cash equivalents of \$3,356,010 to settle current liabilities of \$1,181,778. The majority of the Corporation's financial liabilities have contractual maturities of less than 30 days and all are subject to normal trade terms except for the claim settlement as described in Note 12.

(e) Market risk

Market risk is the risk that changes in market prices, foreign exchange rates and interest rates will affect the Corporation's net earnings or the value of financial instruments and are largely outside the control of the Corporation. The objective of the Corporation is to manage and mitigate market risk exposures within acceptable limits, while maximizing returns. Primary market risks are as follows:

(i) Foreign currency risk

The Corporation is exposed to currency price risk on sales denominated in U.S. dollars ("USD") to the extent that the receipt of payment of the U.S. and Singapore denominated accounts receivable are subject to fluctuations in the related foreign exchange rate.

The carrying amounts of the Corporation's monetary assets and liabilities denominated in foreign currency but stated in Canadian currency, at June 30, 2017 and December 31, 2016 are as follows:

	Foreign Currency	 June 30, 2017	June 30, 2016		
Cash	USD	\$ 408,269	\$	562,207	
Accounts receivable	USD	\$ 950,346	\$	398,058	
Accounts receivable	SGP	\$ 84,314	\$	-	
Accounts payable	USD	\$ (550,064)	\$	(401,527)	

(ii) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Corporation is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

(f) Capital management

The Company's target Working Capital Ratio (Current Assets divided by Current Liabilities, which is an indicator of its ability to finance its on-going operations) is 2:1. The working capital ratio of June 30, 2017 was 4.0:1 (December 31, 2016 - 4.9:1). The Company's business has been managed with a strong working capital position which has enabled the Company to operate without debt.
